

# Executive Diploma in Six Sigma

By

Genaxis Sdn Bhd In Partnership With American Society For Quality (ASQ)

## COURSE INTRODUCTION

Six Sigma provides businesses with the tools to improve the sigma capability of their processes, leading to defect reduction and vast improvements in profits. Companies with an effective infrastructure that remains consistent with the classic Six Sigma system realizes dramatic income improvements - often immediately after implementation. The objective of Six Sigma is to improve profits through defect reduction, yield improvement, improved customer satisfaction, and best-in-class product / process performance. The training is an important facets of the deployment strategy; therefore the key to successful implementation is the creation of sustainable Six Sigma infrastructure within an organization that also consist of best trained people working by effectively utilizing Six Sigma tools and methodology.

This diploma course would help aspiring professionals to achieve targets and goals of improved performance and profitability within their organization which will lead to Black Belt Certification
